

# Organic, Shade-Grown, Fair Trade Coffee For Sale

*from Building New Hope - [www.buildingnewhope.org](http://www.buildingnewhope.org)*

Building New Hope’s signature coffee — roasted to a light French roast, yielding a medium body, crisp, full flavor cup of coffee — comes directly from El Porvenir, a farming cooperative of 48 families near Leon, Nicaragua. Buying this coffee guarantees fair market and living wages for the farmers. The farmers use recognized proper environmental practices from planting through processing. Shade-grown coffee reduces soil erosion and maintains biologically diverse habitat for plants, birds, & other wildlife. The coffee is certified organically grown by the OCIA (Organic Crop Improvement Association). We also offer decaffeinated organic, fair trade coffee, using a chemical-free water process, from cooperatives throughout Latin America.

**Sales from this fundraiser support the Imagine Environmental Charter School at Frick Park**

**Whole Bean or Ground, Regular or Decaf, \$13/lb.**

All coffee is \$13 per pound • Please make checks payable to ECS PCO

Order deadline: the 20th of each month. Delivery date: the first day of school of each month.
